

KIBLER CHEMICAL CORPORATION

ASDC-6072-3/1.5/SS

The ASDC-6072-3/1.5/SS is one of our larger water softeners. The ASDC-6072-3/1.5/SS features 1.5" regeneration and 3" outlet stainless steel face piping, a twin alternating stager and controller which can be controlled with air or water pressure, a flow sensor, and optional flow transmitter capability. This softener also features Carbon Steel Epoxy lined ASME code tanks and stainless steel service and regeneration valves. Kibler Chemical engineers design and build to customer requirements and consult with any special customer needs.
